

## **BACKEND ROLE**

### **Description:**

Curefit Backend Engineering Team is building systems and infrastructure to enable seamless user experience across all our offerings i.e. cult.fit, eat.fit, mind.fit, care.fit and Curefit Digital. Backend engineering powers all the user experiences be it on the App or at one of our cult.fit, mind.fit or care.fit centers. The team is also involved in building the business process systems behind each of our verticals.

### **Responsibility:**

- Strong Technical Chops: You should know how to build highly scalable, robust, and fault-tolerant services that support our unique rate-of-growth requirements. You should be on top of the latest architectural trends.
- Fast Learners: We are looking for folks who thrive on new technologies and don't believe in one-size-fits all solutions. You should be able to adapt easily to meet the needs of our massive growth and rapidly evolving business environment
- Design and Business Acumen: You understand requirements beyond the written word. Whether you're working on an API used by other developers, an internal tool consumed by our operation teams, or a feature used by millions of customers, your attention to details leads to a delightful user experience.

### **Experience Range:**

1+years of Experience

### **Skill Sets:**

Programming, Scalable Systems, Computer Science, Software Design, Performance Tuning, Data Processing, API Servers.
